ONLINE
DARTBOARD

3 ELEMENTS OF

HOW TO PLAY

To be a Medalist member, a Medalist Member Card is required. Medalist Member Card can be purchased directly from Medalist Distributors or Medalist dealers. After getting a new card, each player is requested to follow these steps:

1 ACTIVATE YOUR CARD

● Select Card Management menu

● Swipe card to activate it

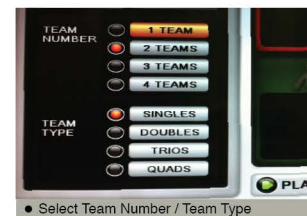

Active a new card by selecting the “Card Management” function in a online Dartboard.

2 PLAY THE GAME

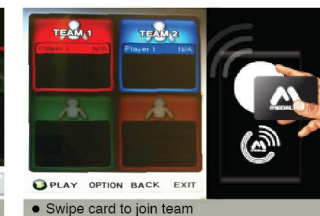

After the activation is completed, a player can select a game and start to play. Game result and statistics will be recorded automatically in the server.

● Select Game

● Select Team Number / Team Type

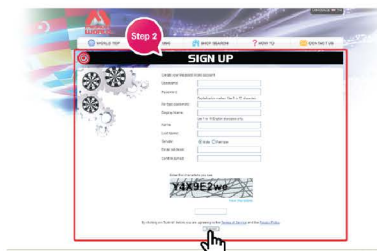

● Swipe card to join team

3 SIGN UP

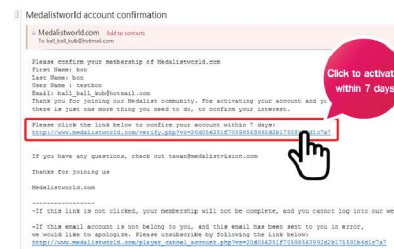

View your statistic by signing up at www.medalistworld.com

● Click sign up button

● Complete the registration form

● Confirm your email address

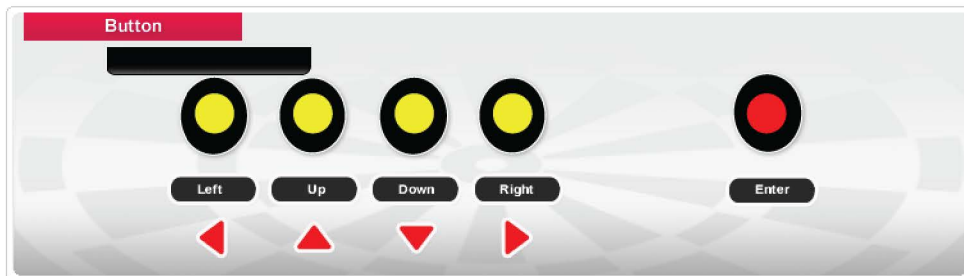

● Add your card to your account

From the instruction above, we can see that player can play a game before applying to medalistworld.com. On the other hand, player can register to the website before getting a card and he can apply the card to the website later. For each account , it can hold maximun 5 cards. The playing result of each card will be collected separately.

MEDALIST PLUS ONLINE DARTBOARD

To play a game, players have to access the game software by using the buttons to select the game. The Spectrum Infinity is designed to implement a new simple button interfacing to enhance more user friendly interfacing. The yellow buttons are for cursor moving and the red button is for selecting or entering which is different from the earlier Spectrum dart model.

After selecting a game, player needs to insert coin(s) corresponding to the total credit requested, depending on type of game and number of player. If player has a Medalist Member Card, swipe the card when the machine asks for the card. Then play the game. However, players can play game without card also.

Medalist Rating System

What is the Medalist rating system?

It is a good start for you to learn about the Medalist rating. Our system has been developed from the handicapping system in golf. Consequently, it becomes a parity system which has covered the wide ranges of ability levels. The purpose of the Medalist rating is to provide all players fair competitions which suit best with their abilities.

It makes it easier for the players to compete with others of equal expertise. Also, it helps avoid the situations in which beginners are always bashed by the more experienced players because they are already assigned the appropriate ratings.

How does the rating system work?

In the game of all O1 and Standard cricket, the Medalist electronic dart boards and the online website works hand in hands to calculate the average stats the players can score. At the end of a game, each player can see their average stats and the rating on the screen.

However, the system is designed to monitor the player's rating in the most accurate way. One remark should be made that a rating number drawn from a few games may not be able to give the overall picture of the real ability each players has. If you want to have the ratings assigned, you can play O1 and/or Standard Cricket in the number of minimum requirement according to our classification. The Medalist system classifies the player's ratings into three groups:

Not Available, Temporary and Permanent.

The N/A will be displayed during the 1st to the 9th games. A player has to play at least ten games or his/her ratings will be Not Available.

The Temporary ratings will be displayed if the 10th game is finished.

The Permanent ratings will be displayed if the 40th game is finished. Once a player has a minimum of 40 games recorded, a Permanent Rating is calculated and assigned. The Medalist electronic dartboards automatically collect the scores by comparing the average stats with the ranges one to seventeen (from beginners to very skillful players).

'01 Ratings (Avg. Total Points Per Round)		Standard Cricket Ratings (Avg. Total Marks Hit Per Round)	
0 - 44.99	1	0.00 - 1.49	1
45 - 49.99	2	1.50 - 1.69	2
50 - 54.99	3	1.70 - 1.89	3
55 - 59.99	4	1.90 - 2.09	4
60 - 64.99	5	2.10 - 2.29	5
65 - 69.99	6	2.30 - 2.49	6
70 - 74.99	7	2.50 - 2.69	7
75 - 79.99	8	2.70 - 2.89	8
80 - 84.99	9	2.90 - 3.09	9
85 - 89.99	10	3.10 - 3.29	10
90 - 94.99	11	3.30 - 3.49	11
95 - 99.99	12	3.50 - 3.69	12
100 - 104.99	13	3.70 - 3.89	13
105 - 109.99	14	3.90 - 4.09	14
110 - 114.99	15	4.10 - 4.29	15
115 - 119.99	16	4.30 - 4.49	16
120 - Plus	17	4.50 - Plus	17

How does the rating system work in Tournament and League play?

In a Medalist League or Tournament, the ratings are used in the divisions in order to group players into "Flights". These Flights are named with an alphabet A, B, C. The C-Flight is the lowest division, while the A-Flight is the highest one. Double or triple alphabets could also be used, so all range of flights could be as follows: A, AA, AAA, B, BB, BBB, C, CC, CCC Flights.

In the doubles tournament, two players can team up and join the competition. They can combine their rating and compete in the Flights whose maximum total rating fit their combination. In this way, an experienced player can team up with a teammate of lower ability. The new player is more likely to be motivated and train harder and improve faster with this skilled partner-team combo. However, an individual limit is set to ensure Parity among all flights as well.

How do you get your rating?

You can view your score and rating by looking at the final screen on our online electronic dart board or login into the Medalist World website.
